

THE RIGHT CHOICE

YOUR GLOBAL PROVIDER OF QUALITY ASSURANCE FOR YOUR CONTAINMENT, SORTING, INSPECTION, AND QUALITY CONTROL NEEDS.

ABOUT US

Stratosphere Quality is an official provider of Quality Control, Quality Assurance, and Quality Systems development support, including sorting and rework services for several manufacturers.

Our objective is to stand alongside our clients to effectively solve quality issues and minimize operational disruptions.

We place highly capable, trained, and experienced teams on quality assurance/systems projects for manufacturers across the globe.

Refined project management, best practices in quality assurance systems development, and quality audits are among the reasons our clients continue to see us as the leader in QA/QC services.

PROVIDING GLOBAL QUALITY SUPPORT SERVICES TO MANUFACTURERS

The Stratosphere Quality team understands your concerns and needs - geographic limitations, limited staff and/or space, schedule constraints, and the need for dedicated and separate spend control. That's why we offer key services and solutions that provide efficient outcomes.

KEY SERVICES

- Multi-state Inspection, Sorting, and/or Rework
- National Field Response Teams
- Aftermarket Parts Packaging
- Portal Installations
- Inventory Support
- Relabel & Tagging
- Warehouse Equipment & Technology Installations
- Light Assembly
- Sales Display Installations
- Quality Assurance Services
- Scanning Technology

PROACTIVE SOLUTIONS FOR YOUR QUALITY ISSUES

Stratosphere Quality has established efficient processes and capabilities to deliver quality assurance services across diverse locations while maintaining flexibility and responsiveness to client needs.

We scale up the workforce to meet client demands quickly for multi-location projects. Our key focus areas are effective recruitment, onboarding, and training processes to ensure that staff can start working on assignments promptly when travel is needed. Stratosphere Quality operates on a broad geographic scale, covering a wide range of locations across the United States, Canada, and Mexico. We are experienced in navigating different regulatory environments and logistics challenges across various regions.

Our dedicated travel team underscores the importance of efficient logistical support for smooth operational delivery. We utilize a routing program to ensure efficient coordination of accommodations, transportation, and other logistical aspects when teams are traveling to various locations.

TRUST IS EARNED THROUGH RESULTS

Stratosphere Quality boasts a proven track record of success in delivering exceptional quality and service. Numerous satisfied clients testify to our ability to consistently exceed expectations, making us the reliable choice for your needs.

To earn your trust, we offer:

24/7 availability so we are there when you need us

A highly professional, trained field team including account managers, project managers, engineers, and support staff

A dedicated Customer Service team is available by phone, chat, or email to support your project to the highest standards

A proprietary data system, SOLAR (Stratosphere Online and Reporting) includes customized project dashboards, various exportable data reports, invoices, work instructions, and much more.

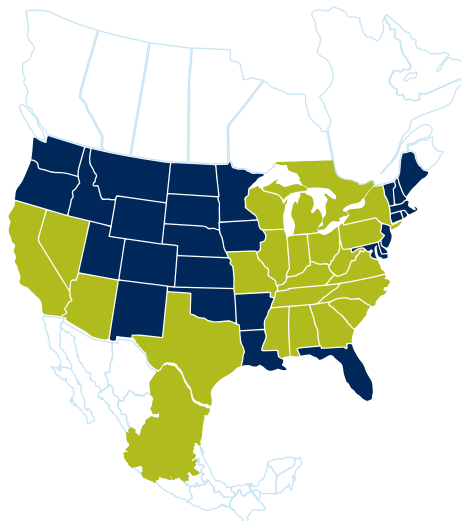

LEARN ABOUT SOLAR

NATIONAL AND INTERNATIONAL COVERAGE

We are a company with an unwavering commitment to quality that develops and implements solutions to improve quality throughout the manufacturing supply chain. Stratosphere Quality understands that projects do not wait.

We are responsive to quality issues around the clock and around the world including the United States, Canada, and Mexico.

CASE STUDY MATERIAL SOURCING AND OPERATIONS TESTING

Navigating Crisis: Materials sourcing, fabrication and operations testing for unforeseen challenges

SCOPE OF WORK

A key provider of a crisis management communications hardware found, during an installation, that parts sent for the project did not fit existing mounts and production failed to ship enough speaker cabling to complete the installation. The expectation was to complete the installation on time without sacrificing quality.

EVIDENCE OF SUCCESS

Stratosphere sourced and installed suitable materials locally to fabricate new mounting plates for both speakers on-site. The team also fabricated a 16-conductor wiring harness for speaker installation to make up for the lack of cabling. The Stratosphere team then worked with the Customer's Engineering team virtually to perform foundation operations tests for all capabilities.

REAL RESULTS TO CLIENT

Both new systems were commissioned with minimal delay or impact to the end user.
