

CONTAINMENT & REWORK SERVICES

Stratosphere Quality is an official provider of quality assurance services, including sorting, rework and yard containment services for several auto manufacturers.

Our rapid mobilization capabilities, along with our proven project management methodology, allow us to continue to provide our clients with assurance in identifying and containing non-conforming parts. Our team works in staged designated areas within the manufacturing environment with consistent workflow processes across shifts and projects.

Utilization of technology allows for project managers and plant representatives to see real-time data for quality alerts, verification of scans, and customizable reports, so that clients can be confident in the outcome.

ABOUT US

Stratosphere Quality provides quality assurance resourcing and professional services across the US, Canada, Mexico, China, and Japan. Our services extend across 3,200 manufacturers and suppliers.

ISO 9001 and ISO 13485 certified

Expansive geographic footprint allowing us to quickly assist OEMs, Tier 1 and Tier 2 suppliers

Superior technology for data tracking and analysis

Recognized by OEMs and suppliers for outstanding performance and achievement

EXCLUSIVE THIRD-PARTY PROVIDER FOR:

- ✓ **28 major OEM automotive plants**
- ✓ **15 OEM medical manufacturers**
- ✓ **2 power equipment manufacturers**
- ✓ **Multiple Tier 1 and Tier 2 programs**

RAPID MOBILIZATION

Rapid mobilization, and well defined processes for surge activity, managed by a dedicated agency management team.

REAL-TIME DATA

Scanning technology designed to integrate with SOLAR Engage to enhance critical data management.

PROJECT MANAGEMENT

Proven project management and utilization of data for greater efficiency of inspection and quality performance.

SOLAR ENGAGE DASHBOARD

Stratosphere Quality's SOLAR Engage platform features real-time data reports with an initial dashboard showing all active projects within your facility. See the total number of inspected, nonconforming and reworked parts, including quality alerts, and work instructions.

The Initial dashboard includes color coding based on part fallout percentage, among other features.

RELEASABLE REPORTS

After evaluation, compiled reports can be released through SOLAR Engage. Create customized reports with filtered views.

PARETO REPORTS

Pull a Pareto graph and create a report indicating defect count for parts and components, compared to total defects.

WORK INSTRUCTIONS

Review and download a collection of work instruction documents in the SOLAR Engage platform.

VIN REPORTS

View sortable reports by VIN, including viewing remaining or unscanned VINs. Filter the view, and export a clean dataset to CSV.

DEFECT REPORTS

View Batch & Hold data reports with filter and sort capabilities. Real-time defect data, designed for accuracy.

TRAINING LOGS

Inspection projects are high-profile activities. View the training status of trainees for each revision level.
